

Aerospace Supplier Collaboration (ASC)

ASC is For: The aerospace businesses who need to manage their data and organisations in a structured, disciplined manner.

Who Needs ASC: Collaboration and control within the enterprise and to the customer, partners and/or suppliers. Work package and business process management

ASC is: Preconfigured SMARTEAM data management for the aerospace and defence business

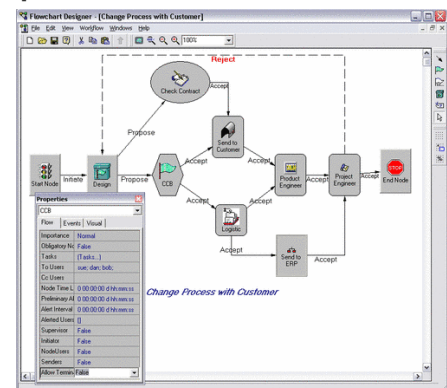

That provides:

- Automation of business processes through preconfigured templates
- Strengthened internal and external collaboration
- Control product data against aircraft program structure
- The possibility to secure and standardize the Workflow through the hole factory processes

The preconfigured workflow is designed to manage the disciplines within:

- Internal Release
- NC Programming
- Document Management
- Control of Non-Conformance
- Corrective Action Report
- Product Design and Analysis Flow
- Design & Development Change
- Problem Report and Engineering Change
- Additional Task Management
- Creation of Programme Class Structure
- Creation of Document Class Structure

ASC provides aerospace suppliers / defence suppliers with a specific, industry related, preconfigured SMARTEAM environment to enable and streamline key business processes and to capture paper based forms in an electronic format

Idé-Pro Engineering & Software A/S:

We assist our customers in solving their technical- and administrative engineering challenges:

- Sales and implementation of Data Management and Engineering Software Solutions, with emphasis on PLM/PDM, Quality Compliance, CAD, CAM, FEM, MBS and CAE, focussing on products from Dassault Systemès.
- Assistance to product development, design, construction, analysis, optimization, and the practical realisation of development and manufacturing projects.
- Our customer base covers a wide range of Denmark's leading companies in design, shaping, electronics, machinery, automotive, aerospace and defence. We are a company in the Idé-Pro Skive group – The leading North European supplier of tooling and injection moulded parts – focusing on prototypes, small- and medium series production.

Aerospace Supplier Collaboration (ASC)

ASC provides aerospace suppliers with change management controls to illustrate compliance with key industry standards

ASC provides a structure that relates to the aircraft programme against which product data is associated allowing the business to quickly find the latest relevant information

ASC allows aerospace suppliers to structure, document, track and automate the who, what, where, why and how of carrying out a workpackage through workflow templates
