

## Quality certification support

For the purpose of having issued national and international approval for vehicles and vehicles parts, the authorities do have specific requirements for the quality procedures.

We advice and offer support in, and about the complete processes for the initial assessment for certification as recognized approval holder for national and international approvals:

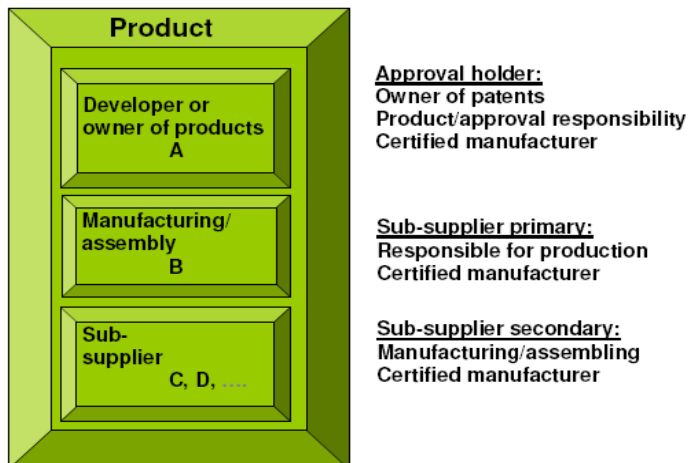

- Automotive Electronic systems and Electronic components
- Vehicle type approvals
- Vehicle component approvals

The authorities granting and issuing the approvals based on the below mentioned documentation:

- a certificate verifying compliance with the EN ISO 9001-2000 quality standard or another equally established standard,
- a confirmation of verification
- a confirmation from another European type approval authority of a successful initial assessment that has completed.

The certification and initial assessment is required for all vital participating companies in the production process of the approved products.

### Responsibility for Product/production

### Idé-Pro Engineering & Software A/S:

We assist our customers in solving their technical- and administrative engineering challenges:

- Sales and implementation of Data Management and Engineering Software Solutions, with emphasis on PLM/PDM, Quality Compliance, CAD, CAM, FEM, MBS and CAE, focussing on products from Dassault Systemès.
- Assistance to product development, design, construction, analysis, optimization, and the practical realisation of development and manufacturing projects.
- Our customer base covers a wide range of Denmark's leading companies in design, shaping, electronics, machinery, automotive, aerospace and defence. We are a company in the Idé-Pro Skive group – The leading North European supplier of tooling and injection moulded parts – focusing on prototypes, small- and medium series production.

## Quality certification support

### Consultancy:

Includes contact to certification authorities and approval authorities for the whole certification process, and consist of:
